To attend, Please email info@anewvista.com (Payment will be collected at the class)

Friday, January 17, 2020 (9:30 AM - 11 AM)

Connected Cars – Connected cars are steering us toward safer and more convenient rides — and fueling a multi-billion-dollar data industry. This class will give you some insights into the future of car maintenance and features.

Friday, February 7, 2020 (9:30 AM - 11 AM)

In-Home Monitoring – As we age, our homes can become dangerous places, especially if we live alone or have health problems. There are many technologies being used for In-Home monitoring. This class will inform you about such technologies.

Friday, February 21, 2020 (9:30 AM - 11 AM)

IoT (Internet of Things) – Internet-connected devices use built-in sensors to collect data and, in some cases, act on it. IoT connected devices and machines can improve how we work and live.

Friday, March 6, 2020 (9:30 AM - 11 AM)

What is AI? – Artificial intelligence (AI) makes it possible for machines to learn from experience, adjust to new inputs and perform human-like tasks. Your participation today will matter in future decisions.

Friday, March 20, 2020 (9:30 AM - 11 AM)

Create your own YouTube/TikTok Channel – This is a fun hands-on workshop for you to explore your hobbies and enjoy some light-hearted videos/music.
